

# M-STOOL

Design by Jørgen Møller

## M-Stool:

The renowned Danish architect Jørgen Møller designed the M-stool in year 2000. It shortly became a heavy weight among the Danish design classics. The stool has been exhibited at the Museum of Modern Art (MoMA) in New York City and it can be seen in all Danish embassies around the world. Jørgen Møller gained his fame for his ability to combine form and function, he showed this with many of the designs he made for the Danish brand Georg Jensen, and he has showed this again with the M-stool, where seating comfort, beautiful design and great strength is the key markers for the design.

## Standard colour:
